

Server/Cluster Token

Don't Starve Together requires that server owners specify a cluster token before the server will start and will allow players to join. This token is very easy as long as you own a copy of Don't Starve Together.

1. Launch the game and hit "Play" on the first menu.
2. Click on the "Account" tab located in the bottom right corner of the game.
3. Click the "Generate server token" button on the popup window.
4. Paste this into the Server/Cluster Token field on the panel and save.

You can now start your server.
