Importing a modpack from CurseForge

Before you follow this guide you will need to have already downloaded the modpack.zip of the modpack you want to import from CurseForge or if its a custom pack using the Twitch app you will need to export the modpack. Twitch has a guide on exporting modpacks here

https://support.curseforge.com/en/support/solutions/articles/9000197912-exporting-and-importingmodpacks

Click on the instance you want to import the modpack to (

https://www.creeperhost.net/wiki/books/minecraft-java-edition/page/finding-your-

instances) then make sure that the server is stopped by pressing the red stop button in the top right.

Next click on the Importer link in the instance navigation
