# Connecting to your server via Steam

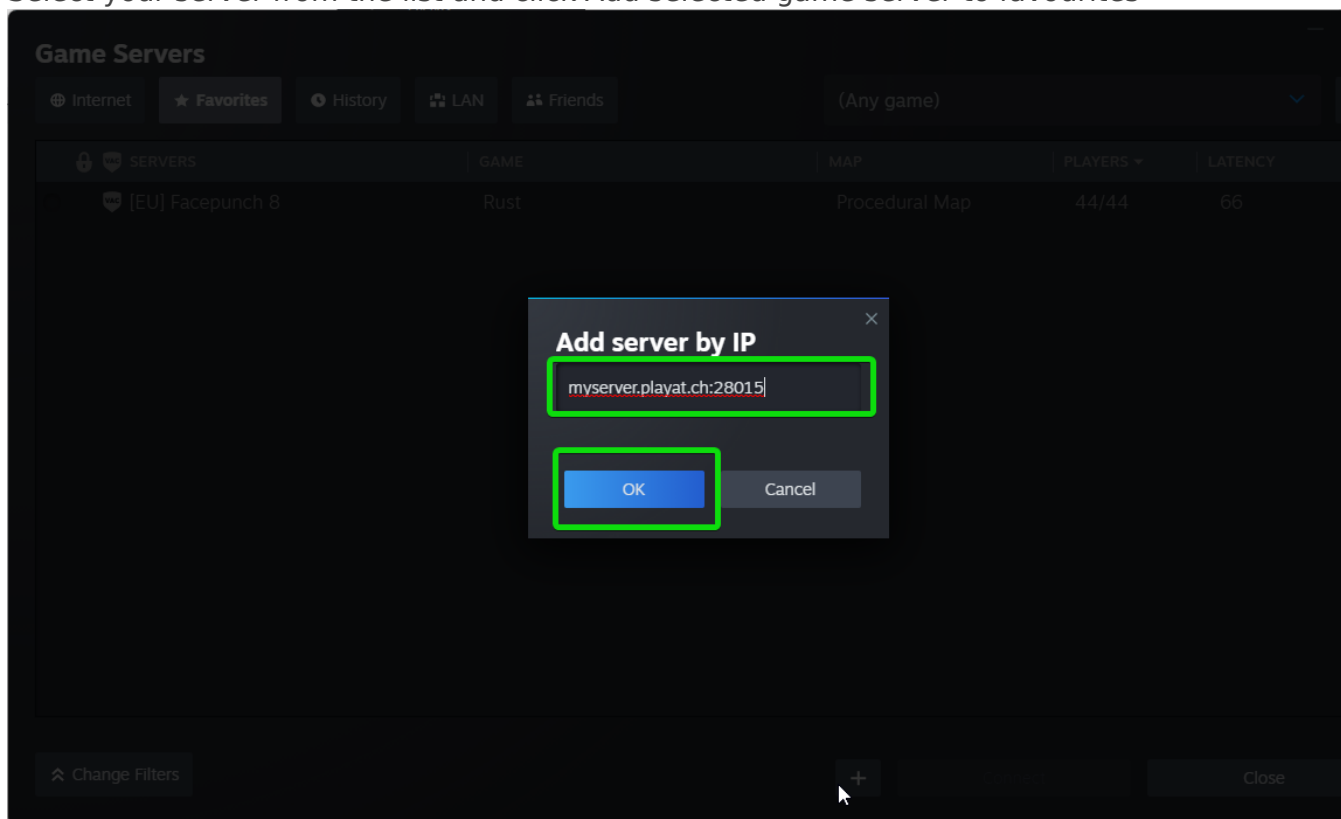

1. Open the Steam client and in the top left click on **View > Servers**

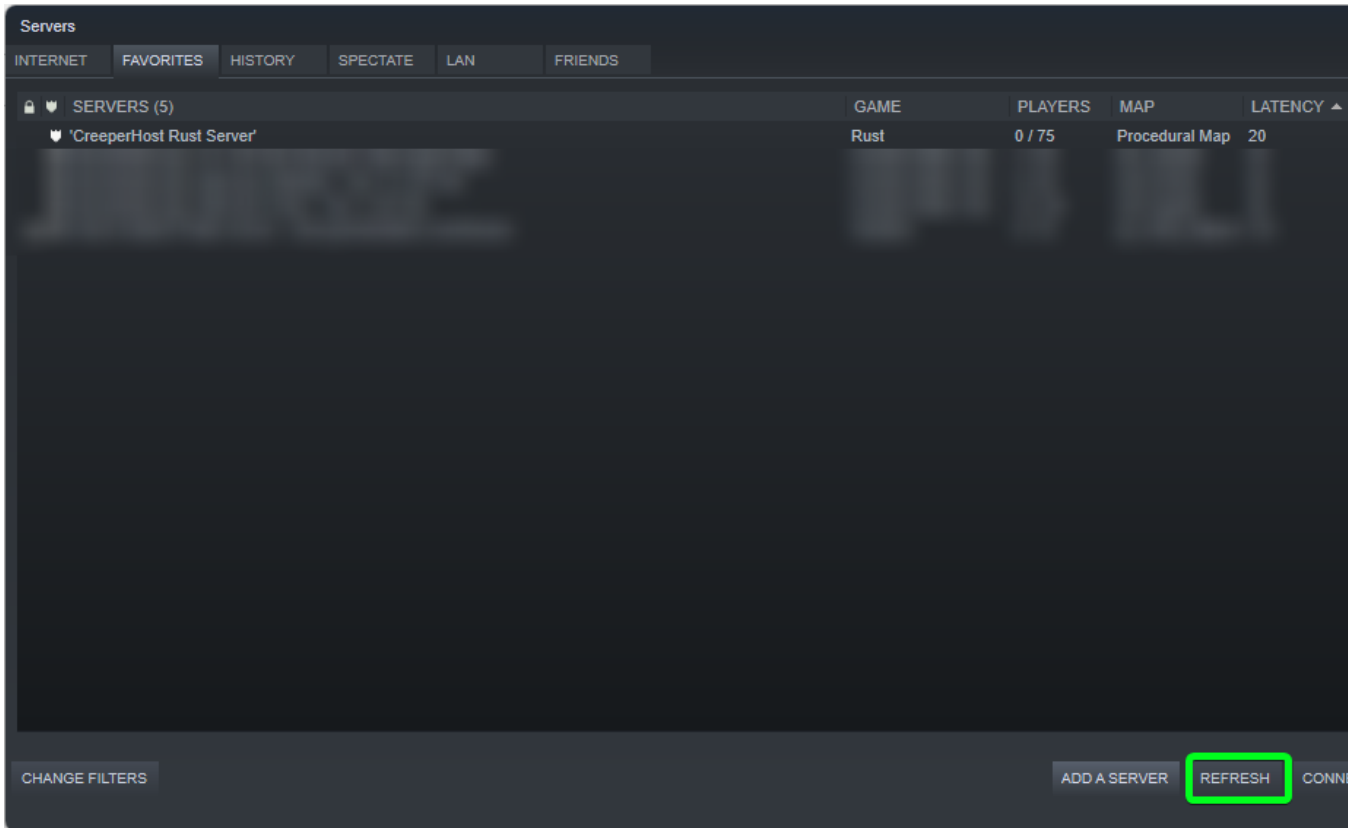

2. Click on the **Favourites** tab then click on **Add a Server**

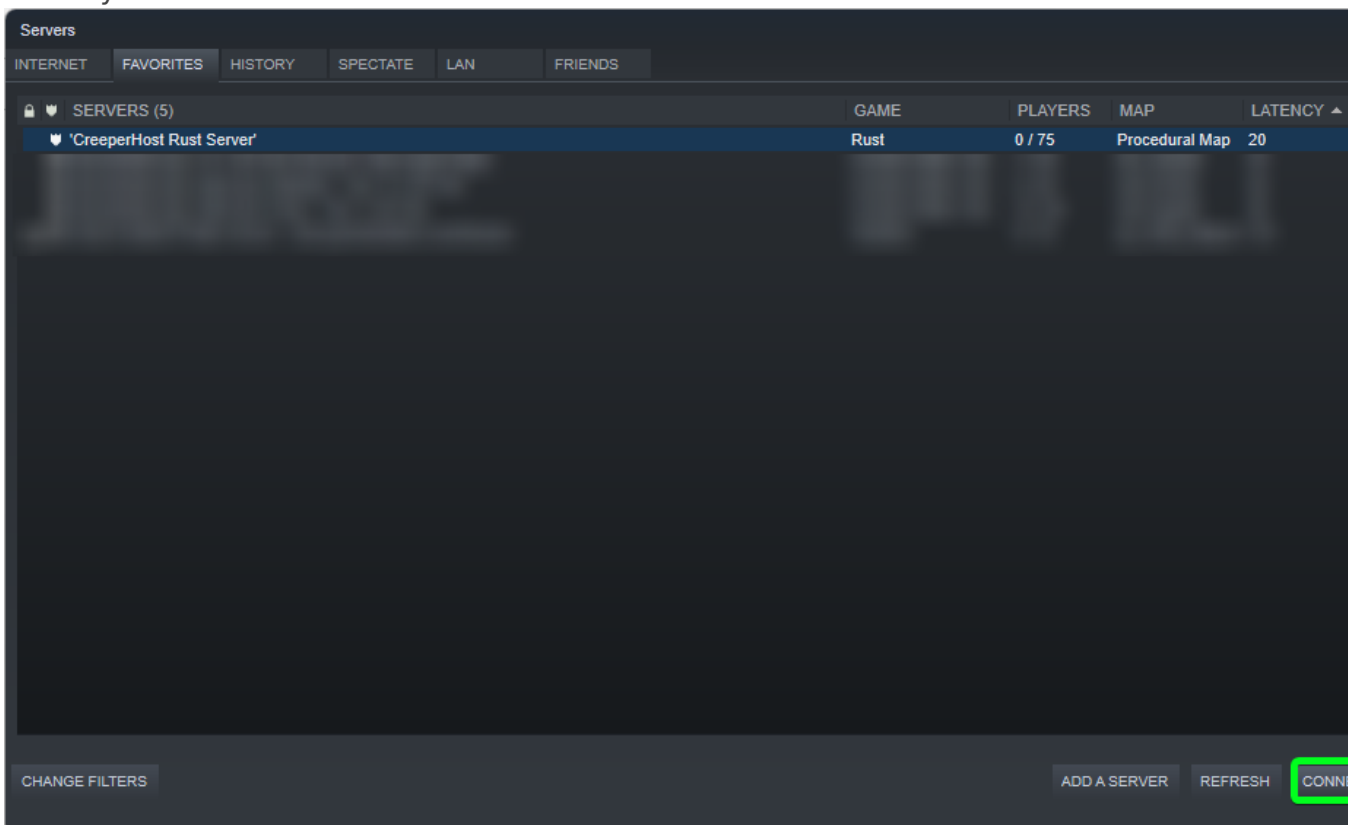

3. Enter the Hostname or IP address found on the Access page of the panel then click on **Find games at this address**
4. Select your server from the list and click Add selected game server to favourites

5. Click on the **Refresh** button

6. Select your server from the list then click on **Connect**

# How to find a player's SteamID

Some games require using a player's SteamID to grant admin permissions or banning the player so you will need to get their SteamID. You can use a website such as <https://steamid.io/> to get their SteamID.

1. Navigate to <https://steamid.io/>
2. Once the website has loaded you will need to enter one of the following options:
  1. Steam profile URL (E.g. <http://steamcommunity.com/profiles/76561197960287930> or <http://steamcommunity.com/id/gabelogannnewell>)
  2. Steam username
  3. SteamID (E.g. STEAM\_0:0:11101)
  4. SteamID64 (E.g. 76561197960287930)
  5. SteamID3 (E.g. [U:1:22202])
3. Click on the lookup button and you should now get their SteamID in all the available formats
4. Copy the SteamID in the format you need it and enter it in the relevant place

# CraftTopia: Changing to legacy branch

To play on your dedicated server, you will need to change the branch your game is on.

To change the branch, open Steam and go to your library.

Find CraftTopia then right click on it and select `Properties`

In the window that opens, click on `Betas` then click the dropdown box adjacent to `Beta Participation` and select `legacy`

Close the window then wait for the game to finish updating, once it finishes, you should be able to start it up and connect to your server.
